PROFESSIONAL SUMMARY

AI & Data Science undergraduate (CGPA 9.05) with hands-on experience building machine learning, data analytics, computer vision and full-stack Python applications. Proficient in end-to-end ML pipelines (EDA, feature engineering, model training, evaluation), SQL and dashboards.

SKILLS

- Programming Languages:** Python, C, C++, SQL, Shell Scripting.
- Databases:** MySQL, PostgreSQL, MongoDB, Relational Database Design.
- Machine Learning & AI:** Supervised Learning (Classification, Regression), Anomaly Detection, Natural Language Processing (NLP), Computer Vision, Feature Engineering, Model Evaluation.
- Data Science & Analytics:** Pandas, NumPy, Matplotlib, Seaborn, Power BI, Plotly, Data Visualization, Exploratory Data Analysis (EDA), Statistical Analysis, Data Cleaning.
- Frameworks & Tools:** Scikit-learn, OpenCV, MediaPipe, Flask, FastAPI, Streamlit, Git, GitHub, Jupyter Notebook, Data Structures & Algorithms.

EDUCATION

Bachelor of Technology in Artificial Intelligence And Data Science

Marathwada Mitra Mandal College Of Engineering, Pune

August 2024 – Present

CGPA: 9.05, Relevant Courses: Data Structures, Machine Learning, Databases

Bachelor of Science in Data Science and Application

Indian Institute Of Technology, Madras

August 2024 – Present

Relevant Courses: Machine Learning, Python, Database, Business, Java, App Development

PROJECTS

SafeRoute: Crime Prediction & Safe Navigation System

- Tech Stack: Python, Scikit-learn, FastAPI, OpenRouteService API, Folium, Data Visualization
- Developed a machine learning model to predict crime risk from historical crime data and score candidate routes based on predicted risk.
- Integrated OpenRouteService for real-time road routing and Folium for interactive maps, enabling comparison of multiple routes and identification of the safest route.

Stock Price Prediction & Interactive Dashboard

- Tech Stack: Python, Machine Learning, Scikit-learn, Pandas, yfinance, Power BI, Streamlit
- Built a predictive analytics engine using time-series machine learning models to forecast stock market trends and asset performance, with historical data pulled through the Yahoo Finance API (yfinance).
- Designed an interactive Power BI and Streamlit dashboard to visualize historical stock metrics, moving averages and live prediction trends.

Customer Churn Prediction

- Tech Stack: Python, Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn, Jupyter Notebook
- Developed an end-to-end machine learning classification pipeline using the Telco Customer dataset, covering data cleaning, exploratory data analysis, feature encoding, preprocessing, and model training.
- Evaluated model performance using accuracy, precision, recall, F1-score, and confusion matrix, while analyzing churn patterns across tenure, contract type, services, and monthly charges.

GestureControl: Real-Time Hand Gesture Recognition System

- Tech Stack: Python, OpenCV, MediaPipe, CVZone, pytsx3
- Developed a real-time computer vision system that tracks hand landmarks and recognizes gestures using different combinations of all 10 fingers.
- Optimized gesture tracking for stable, low-latency recognition and converted detected gestures into on-screen text, speech output, and logs for human-computer interaction.

CERTIFICATES

- Cloud Foundations** - AWS Academy Graduate (Sept 2026)
- Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate** – Oracle University (Aug 2025)
- Foundational Level in Programming and Data Science** – IIT Madras (Dec 2025)
- Fintech Essentials: AI, Blockchain, and Digital Lending** - TimePro (Oct 2026)
- Master in Data Analysis and Analytics** - Udemy (July 2025)
- Deloitte Australia - Data Analytics Job Simulation** - Forage (July 2025)
- Financial Literacy Course for Bharat** – National Institute of Securities Markets (NISM/SEBI) (Feb 2026)
